

# Data Analysis Training Guide (1 Month Program)

## Program Structure

Each day follows a structured learning loop:

- 1 Morning Session: Concepts and demonstrations
- 2 Afternoon Session: Hands-on practice and real-world application
- 3 Assignments: Reinforcement and retention

## Day 1: Excel Fundamentals

Objective: Understand basic Excel operations and formulas.

- 1 Calculate SUM, AVERAGE, MIN, MAX
- 2 Work with cell referencing
- 3 Format data properly

## Classwork

- 1 Compute TotalPrice
- 2 Find highest and lowest sales
- 3 Calculate total revenue

## Assignment

- 1 Find average quantity sold
- 2 Identify highest transaction

## Day 1 (Session 2): Logical Functions

- 1 Use IF, AND, OR
- 2 Apply SUMIF and COUNTIF
- 3 Perform sorting and filtering

## Assignment

- 1 Find most used payment method
- 2 Determine top region by sales

## **Day 2: Data Cleaning**

- 1 Use TRIM, PROPER, SUBSTITUTE
- 2 Remove duplicates
- 3 Split columns using Text-to-Columns
- 4 Extract text using LEFT, MID, RIGHT

### **Assignment**

- 1 Clean dataset fully
- 2 Extract city, year, and type from codes

## **Day 2 (Session 4): Power Query**

- 1 Import dataset
- 2 Transform data
- 3 Refresh queries

## **Day 3: Visualization**

- 1 Create charts
- 2 Use conditional formatting
- 3 Design reports

### **Assignment**

- 1 Build a report with charts
- 2 Provide insights

## **Day 3 (Advanced Formulas)**

- 1 INDEX/MATCH
- 2 SUMIFS, COUNTIFS
- 3 IFERROR
- 4 Named ranges

## **Day 4: PivotTables and Dashboard**

- 1 Create PivotTables

- 2 Use slicers
- 3 Design dashboards

## **Final Project**

- 1 Clean the dataset
- 2 Analyze data
- 3 Build dashboard
- 4 Present insights
